TARIFF FORMAT

A. **Page Numbering** - Page numbers appear in the upper right corner of the Page. Pages are numbered sequentially. However, occasionally, when a new Page is added between Pages already in effect, a decimal is added. For example, a new Page added between Pages 14 and 15 would be 14.1.

B. **Page Revision Numbers** - Revision numbers also appear in the upper right corner of each Page. These numbers are used to determine the most current Page version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd Revised Page 14. Because of various suspension periods, deferrals, etc. the Commission follows in its tariff approval process, the most current Page number on file with the Commission is not always the Page in effect. Consult the Check Page for the Page currently in effect.

C. **Paragraph Numbering Sequence** – There are nine levels of paragraph coding. Each level of code is subservient to its next higher level:

2.
2.1.
2.1.1
2.1.1.A.
2.1.1.A.1.
2.1.1.A.1.(a).
2.1.1.A.1.(a).I.
2.1.1.A.1.(a).I.(i).
2.1.1.A.1.(a).I.(i).(1).

D. **Check Page** - When a tariff filing is made with the Commission, an updated Check Page accompanies the tariff filing. The Check Page lists the Pages contained in the tariff with a cross-reference to the current revision number. When new Pages are added, the Check Page is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this Page if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some Pages). The tariff user should refer to the latest Check Page to find if a particular Page is the most current on file with the Commission.

SECTION 3 - DESCRIPTION OF SERVICES, Continued**3.6 LIT FIBER SERVICES, Continued****3.6.6 Rate Categories**

Non-recurring and monthly recurring rates apply for each Lit Fiber Service furnished by the Company. Unless otherwise noted, two standard rate elements are used in calculating the monthly recurring rate for each service. The charges associated with each rate element are expressed as maximum rates.

- A) Fixed Charge: This rate element applies on per circuit basis.
- B) Per Mile Charge: This rate element applies whenever there is mileage associated with the digital channel. The unit rate is multiplied by the number of miles between the two LEC end offices serving the geographic areas in which the end-points of the channel are located. Mileage is determined according to the V&H coordinate method set forth in the NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. No. 4. Fractions of a mile are rounded up to the next whole mile before rates are applied.

3.6.7 Basic and Mixed Vendor Services

DS-3, OC-3, OC-12, OC-48 and OC-192 services may be provided as either Basic or Mixed Vendor Services, depending upon the availability of facilities. Basic Service rates apply when both end-points of the channel are served by the Company's network. Mixed Vendor Service rates apply when one endpoint of the transmission channel is served by one or more third party.

DS-3, OC-3, OC-12, OC-48 and OC-192 channels where both endpoints are served by a local exchange carrier's network will be provided at the sole discretion of the Company, and on an Individual Case Basis (ICB).

SECTION 4 - RATES AND CHARGES**4.1 CALCULATION OF RATES**

- 4.1.1 Rates for service are based on airline mileage between rate centers of the calling and called stations. The location of rate centers is based on information provided by AT&T South Carolina. Mileage is calculated using the Vertical and Horizontal (V&H) coordinate system from the National Exchange Carriers Association Tariff F.C.C. No. 4.
- 4.1.2 Timing of calls begins when the call is answered at the called station. Different rates may apply depending on the time of day or day of week the call is made. Calls originating in one time period and terminating in another time period will be billed according to the rates in effect during each portion of the call.
- 4.1.3 Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carriers.
- 4.1.4 Calls originating in one time period and terminating in another will be billed in proportion to the rates in effect during different segments of the call.
